

Advanced MSUS Hands-on training

September 14 - 18, 2022

Podgora, Croatia

What is better than an instructive, interesting MSUS Course? One that is combined with a beautiful trip! That's why we organise an Advanced MSUS Course in Podgora, Croatia, where we alternate hands-on training with some extraordinary excursions.

After attending this course the participant will be able to perform routine musculoskeletal ultrasound examinations of the various joints. The participant will become familiar with normal ultrasound anatomy as well as ultrasound appearance of clinically relevant pathologies.

The limited number of participants per teacher allows a tailored approach to each participant's needs. There is ample hands-on training and time to practice more difficult structures depending on experience.

Limited registration of 32 participants per session to optimize teacher registrant interaction during hands on.

To receive further information send an e-mail to courses@benetecmed.com.
